Adaptation: (Note 1)—north to central Arkansas; (2)—east, central, and south Arkansas; (3)—west, central, and south Arkansas.

INSTRUCTIONS:

Association members agree to grow and prepare seed for sale according to approved methods to obtain purity, high quality, and good germination. Buy your seed in Arkansas when you can get the seed from an approved source. In buying from members of the Arkansas Seed Growers' Association, be sure the seed purchased is sold with the official tag of the Association properly filled out and bearing the registration number of the seed.

If none of the varieties you wish to grow are given in this list, write to the Secretary of the Arkansas Seed Growers' Association, or to the College of Agriculture at Fayetteville, for information concerning dependable sources out of the state. Approved sources of dependable varieties of cotton, corn, wheat, oats, soybeans, and other field crops will be supplied on request. Information concerning the Association and a copy of the Inspected Seed Requirements will be sent upon request.

For further information write

L. W. OSBORN, Secretary, Fayetteville, Arkansas.
